Persons born overseas (excluding overseas visitors)

X06 BIRTHPLACE (REGIONS) BY YEAR OF ARRIVAL IN AUSTRALIA
Persons born overseas (excluding overseas visitors)

EXPANDED COMMUNITY PROFILE EXPLANATORY NOTES

INTRODUCTION	1. The Expanded Community Profile provides 49 tables. It comprises a more detailed version of some of the Basic Community profile and new tables. The profile is available at the following geographic levels: SLA, LGA, SSD, SD, S. Dist., State, Australia.	Employed full-time/ part-time	10. 'Employed full-time' means that the person worked 35 hours or more in all jobs during the week prior to Census night. 'Employed part-time' means that the person worked less than 35 hours in all jobs during the week prior to Census night.
	2. Information was collected from the 2001 Census of Population and Housing.		11. For Census purposes, people who stated they were employed, but worked zero hours in the week prior to Census night have been coded to 'employed part-time'.
	3. Each table title in the Expanded Community Profile consists of two parts. The first part lists the variables included in the table. The second part describes the table population.	Fact Sheets	12. Fact Sheets have been prepared to provide further information on Census data and concepts.
	4. A glossary of terms and concepts used in the Expanded Community Profiles appears below.	Family	13. A family is defined as two or more persons, one of whom is at least 15 years of age, who are related by blood, marriage (registered or de facto), adoption, step or fostering, and who are usually resident in the same household.
	5. For more information on classifications and Census concepts see the 2001 Census Dictionary (Cat. No. 2901.0).	Family income	14. Family income is the sum of the individual incomes of each resident family member aged 15 years and over who is present in the household on Census night. If any family member aged 15 years and over did not state their income, or was temporarily absent, family income is not calculated. These families fall into the 'no income stated' category. Family income is not applicable to non-family households such as group households or lone person households; or to people in non-private dwellings.
GLOSSARY			
Ancestry	6. Respondents were asked to consider and mark the ancestries they most closely identified with and to count their ancestry back as far as three generations. Respondents had the option of nominating several ancestries but only the first two answers are processed for output purposes. Refer to Australian Standard Classification of Cultural and Ethnic Groups (Cat. No. 1249.0) for further detail.		
Birthplace	7. There are 3 birthplace variables. Birthplace of Individual (BPLP), which records a person's country of birth, and Birthplace of Female Parent (BPFP) and Birthplace of Male Parent (BPMP), which indicate whether a person's parent was born in Australia or overseas. Prior to 2001, parental birthplace was coded to a country.	Hours worked	15. Hours worked is an aggregate of the hours worked in all jobs, not just main job.
Commonwealth Electoral Divisions (CEDs)	8. Some CEDs cross State and Territory boundaries. The implication of this is that State totals derived from CEDs will not equal the official State total counts. Therefore State totals will not be provided for the Expanded Community Profile at CED level.	Household	16. A household is defined as a group of two or more related or unrelated people who usually reside in the same dwelling, who regard themselves as a household, and who make common provision for food or other essentials for living; or a person living in a dwelling who makes provision for his/her own food and other essentials for living, without combining with any other person.
Dependent Child	9. A dependent child is an individual who is either a child under 15 or a dependent student, which is any child in a family under 15 years of age or aged 15-24 years and who is a full-time student. To be regarded as a dependent child the individual can have no partner or child of his/her own usually resident in the same household.		17. For Census purposes, the total number of households is equal to the total number of occupied private dwellings.

EXPANDED COMMUNITY PROFILE EXPLANATORY NOTES (cont'd)

Household income	18. Household income is the sum of the individual incomes of each resident household member aged 15 years and over who is present in the household on Census night. If any household member did not state their income, or was temporarily absent, household income is not calculated. These households fall into the 'Partial income stated' category.	Partial non-response	27. In some cases where an answer was not provided to a question an answer was imputed or derived (often from other information on the form). In other cases a 'not stated' code was allocated.
Industry	19. The industry classification is an indication of the main job only.	Processing error	28. While such errors can occur in any processing system, quality management is used to continuously improve the quality of processed data, and to identify and correct data of unacceptable quality.
Internet Use	20. Respondents were asked whether or not they had used the Internet in the week prior to Census night and if so where they had used it. The question on Internet Use allows for multiple responses. For example, a person who had used the Internet at home, at work and elsewhere, would be recorded as such for each category.	Random Adjustment	29. Cells containing small values are randomly adjusted to avoid releasing information about particular individuals, families or households. The effect of random adjustment is statistically insignificant.
Nfd	21. Nfd means 'not further defined'.	Respondent error	30. Processing procedures cannot detect or repair all errors made by persons in completing the form, therefore some may remain in final data
Occupation	22. The occupation classification is an indication of the main job only.	Undercount	31. Although the Census aims to count each person once, there are some people who are missed and others who are counted more than once. A post enumeration survey is conducted soon after the Census to measure the undercount.
Overseas visitor	23. Overseas visitors are defined differently to the 1996 Census. In 1996, an overseas visitor was any person who stated they would be in Australia for less than 6 months. For the 2001 Census, this has been extended to any person who states they will be in Australia for less than 12 months.	Household Income (HIND) and Family Income (FINF)	32. Due to operational limitations, the family/household income imputation methodology may result in an undercount of the number of families/ households in the \$1,500 - \$1,999 range and a balancing over count in the \$2,000 - \$2,999 range. No other income ranges are affected. This may also affect the median income estimate if the median falls in either of these ranges.
Place of enumeration	24. The Census count, based on place of enumeration, is a count of every person who spent Census night in Australia where they were located. People are counted where they are on Census night, which may not be where they usually live. Census data are also available on place of usual residence.		33. The calculation of median income is based on imputations made from the Survey of Income and Housing Costs, and as such is subject to sampling error. This is particularly evident if the median falls into the highest income range, where the quoted median is a proxy only and should be regarded with caution.
Table population	25. Table population is a description of what the table is counting. For example, tables containing marital status have a table population of persons aged 15 years and over. The population appears under the table title.		34. Further information on data quality will be provided progressively in Census Updates and in the 2001 Census fact sheets and working paper
DATA QUALITY	26. Each state of the Census is subject to stringent quality assurance measures. However, in a census there are recognised sources of error which may survive in the data produced. These include undercounting, processing of the data. Some of these are overcome or 'repaired' by careful processing procedures and quality management of the processing itself. The effect of those that remain is generally slight, although it may be more important for small groups in the population. The main kinds of error to keep in mind are:
